

The Nobel Prize in Physics 2021: Papers by Giorgio Parisi now free to read

📅 27-10-2021 ↗ <http://www.primapagina.sif.it/article/1392>

The Italian Physical Society is very pleased to join the celebrations of the Nobel Prize in Physics awarded this year to Professor Giorgio Parisi with the following motivation: *"for the discovery of the interplay of disorder and fluctuations in physical systems from atomic to planetary scales"*.

SIF has published numerous articles by Parisi in its journals *Il Nuovo Cimento A*, *Il Nuovo Cimento D* and *Lettere al Nuovo Cimento*. These articles are now freely available thanks to the Springer Nature Nobel Prize Campaign (Nobel Prize in Physics 2021 | For Researchers | Springer Nature).

In addition to these publications, SIF is proud to propose three more contributions by Parisi which are present in its archives and to offer them *free to read*:

Il Nuovo Cimento, Vol. **40**, n. 4 (2017) 155: [here](#)

Il Nuovo Cimento B, Vol. **123**, n. 6-7 (2008) 972: [here](#)

Il Nuovo Cimento D, Vol. **20**, n. 7-8 (1998) 1221: [here](#)
