## *Les Rencontres de Physique de la Vallée d'Aoste - La Thuile 2021*

The 2021 Rencontres de Physique de la Vallée d'Aoste were held during the week of March 8-12, with the XXXIV edition of "Results and Perspectives in Particle Physics". As the pandemic due to SARS-CoV2 was still ongoing, the 2021 edition was held in virtual mode only. As usual the physics programme included various topics in particle physics, also in connection with present and future experimental facilities, as cosmology and astrophysics, dark matter and neutrino physics, heavy flavours,  $CP$  violation and rare decays, electroweak and hadron physics with  $e^+e^-$  and hadron colliders, Higgs physics, searches for new physics and prospects at future facilities.
